

Nfs Mental Health Platform

Functional Requirements - Features and Functionalities

This document defines the functional requirements for the Nfs Mental Health Platform. The requirements cover the core features needed for clients, therapists, admins, AI chatbot support, recommendations, wellbeing tracking, notifications, reviews, and secure platform management.

User Registration and Authentication

ID	Requirement	Priority
FR-01	The system shall allow users to create an account using full name, email, password, phone number, gender, and date of birth.	High
FR-02	The system shall allow registered users to log in securely using email and password.	High
FR-03	The system shall support three main roles: Client, Therapist, and Admin.	High
FR-04	The system shall restrict access to features based on the authenticated user role.	High
FR-05	The system shall allow users to update profile information, including profile image, country, governorate, and contact details.	Medium

Client Profile Management

ID	Requirement	Priority
FR-06	The system shall allow clients to create and update a mental health support profile.	High
FR-07	The system shall allow clients to add emergency contact information and mental health goals.	Medium
FR-08	The system shall allow clients to view a dashboard containing upcoming sessions, recommendations, wellbeing records, and notifications.	High

Therapist Profile and Availability

ID	Requirement	Priority
FR-09	The system shall allow therapists to create and update professional profiles including specialization, experience, license number, price, education, certifications, and bio.	High

FR-10	The system shall allow therapists to manage weekly availability with day, start time, end time, and availability status.	High
FR-11	The system shall allow therapists to view booked sessions and update session status when needed.	High

Individual Therapy Session Booking

ID	Requirement	Priority
FR-12	The system shall allow clients to browse available therapists.	High
FR-13	The system shall allow clients to book a 1-on-1 therapy session with a selected therapist.	High
FR-14	The system shall allow clients to choose online or offline session mode.	High
FR-15	The system shall prevent booking unavailable or already reserved time slots.	High
FR-16	The system shall allow clients and therapists to view pending, confirmed, completed, and cancelled sessions.	High
FR-17	The system shall allow cancellation or status updates according to platform rules.	Medium

Group Support Sessions

ID	Requirement	Priority
FR-18	The system shall allow clients to view and join available group support sessions.	High
FR-19	The system shall allow users to participate using real name, nickname, or avatar.	High
FR-20	The system shall prevent users from joining a group session when it is full.	High
FR-21	The system shall allow therapists or admins to create and manage group sessions.	Medium

Secure Communication

ID	Requirement	Priority
FR-22	The system shall allow secure conversations between clients and therapists.	High
FR-23	The system shall store chat	High

	messages with sender, timestamp, read status, and conversation reference.	
FR-24	The system shall ensure that only authorized participants can access a conversation.	High

AI Chatbot

ID	Requirement	Priority
FR-25	The system shall provide an AI chatbot for initial mental health guidance and support.	High
FR-26	The system shall store AI chat sessions and messages securely.	Medium
FR-27	The system shall anonymize AI logs when used for improvement or analysis.	High
FR-28	The system shall display a disclaimer or suggest professional support when the user request is unsafe, unclear, or out of scope.	High

Questionnaires and Recommendations

ID	Requirement	Priority
FR-29	The system shall allow admins to create questionnaires with sections and questions.	High
FR-30	The system shall support question types such as text, scale, and multiple choice.	High
FR-31	The system shall allow clients to submit questionnaire responses and answers.	High
FR-32	The system shall calculate weighted scores for answers and sections.	High
FR-33	The system shall generate personalized recommendations based on profile data, questionnaire results, and wellbeing tracking.	High
FR-34	The system shall store recommendation reason, path type, derived doctor type, and confidence score.	Medium

Wellbeing Tracking

ID	Requirement	Priority
FR-35	The system shall allow clients to record mood score, stress level, sleep quality, and notes.	High
FR-36	The system shall allow clients to	Medium

	view previous wellbeing records over time.	
FR-37	The system shall use wellbeing tracking data to support personalized recommendations when applicable.	Medium

Notifications

ID	Requirement	Priority
FR-38	The system shall send notifications for booking confirmation, cancellation, reminders, new messages, recommendations, and system updates.	High
FR-39	The system shall allow users to mark notifications as read.	Medium
FR-40	The system shall display unread notifications in the user dashboard.	Medium

Reviews and Therapy Notes

ID	Requirement	Priority
FR-41	The system shall allow clients to review therapists after completed sessions only.	Medium
FR-42	The system shall allow admins to approve or reject reviews before publishing.	Medium
FR-43	The system shall allow therapists to write notes linked to individual sessions.	High
FR-44	The system shall restrict access to private therapy notes based on authorization rules.	High

Content and Admin Management

ID	Requirement	Priority
FR-45	The system shall allow admins to create, update, publish, and delete mental health resources.	Medium
FR-46	The system shall allow admins to manage users, therapists, sessions, content, reviews, and platform activity.	High
FR-47	The system shall record admin actions for accountability.	High
FR-48	The system shall keep audit logs for important actions such as login, profile update, booking changes, and access to sensitive information.	High

Functional Requirements Summary

- The system supports registration, login, and role-based access for clients, therapists, and admins.
- Clients can manage profiles, book individual sessions, join group sessions, use the chatbot, receive recommendations, track wellbeing, and receive notifications.
- Therapists can manage profiles, availability, sessions, secure conversations, and therapy notes.
- Admins can manage users, therapists, sessions, content, reviews, platform activity, and audit logs.
- The system supports privacy features such as anonymous group participation and anonymized AI logs.
